Docket No.: 2450-0694PUS1

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A chain reaction control circuit for parallel power supply, comprising:

a power actuation unit to output a first power actuation signal to activate electric power output;

a control unit to receive the first power actuation signal and output a plurality of second power actuation signals; and

a plurality of parallel power ~~supply-supplies~~ to receive the second power actuation signals and transform electric power and output electric power;

wherein the ~~parallel~~ power ~~supply-supplies~~ output first power confirmation signals to the control unit after having finished the electric power transformation, the control unit receiving the first power confirmation signals and outputting a second power confirmation signal to a linked load, and the ~~parallel~~ power ~~supply-supplies~~ supplying the electric power matching the corresponding load.

2. (Original) The chain reaction control circuit for parallel power supply of claim 1, wherein the power actuation unit is a power switch

Docket No.: 2450-0694PUS1

3. (Original) The chain reaction control circuit for parallel power supply of claim 1, wherein the control unit is a driving IC and has signal output legs at a number corresponding to the number of the parallel power supply.
